SigmaXL Version 7!*

DiscoverSim[™]
Discovery through Simulation

- ✓ Excel add-in for Monte Carlo Simulation and Optimization.
- ✓ Easy to use with Six Sigma language – specify Inputs (X's) and Outputs (Y's). Ideal for DFSS, Risk and Project Management.
- ✓ Powerful – 53 continuous and 10 discrete distributions, Distribution Fitting with Automatic Best Fit, specify correlations between inputs.
- ✓ Fast – accelerated calculations with Excel spreadsheet interpreter.
- ✓ Identify important X's with Sensitivity Analysis based on correlation or stepwise regression – includes quadratic terms!
- ✓ Discover solutions to difficult problems with Global Optimization.
- ✓ Optimize statistics such as dpm or Ppk and allow for constraints.
